Education

Bangalore Institute of Technology
Bachelor of Engineering in Electronics and Communications

Bengaluru
Sep. 2023 – July 2027

Experience

Top Notch Studios | *Front End Developer*

Jan 2025 - Jun 2025

- Engineered and deployed the company's primary front-end website using HTML, CSS, JavaScript, Bootstrap and React, ensuring a fully responsive and optimized user experience across devices.
- Integrated a complete Shopify e-commerce solution, configuring the storefront and streamlining the checkout architecture to establish the company's digital sales channel.

Projects

Smart Campus Wallet and Subsidy Engine | Python, JavaScript, SQL, Flask

June 2026

- Engineered a transactional wallet system with Flask APIs for automated 20% scholarship subsidy application and balance validation.
- Designed relational SQL constraints and asynchronous Fetch API modules for zero-overdraft integrity and real-time dashboard updates.
- Implemented asynchronous Fetch API modules for real-time admin dashboard balance updates.

Smart Retail Inventory and Dynamic Pricing Engine | Python, JavaScript (ES6+), SQL, Flask,

May 2026

- Built a full-stack inventory system with Flask REST APIs for atomic stock deductions and volume-based dynamic pricing.
- Designed SQL migrations with relational constraints and asynchronous JavaScript for real-time input validation.
- Developed asynchronous JavaScript modules for real-time input validation and backend communication.

Digital Vehicle Rental and Fleet Tracking Application | Python, JavaScript (ES6+), SQL, Flask,

June 2026

- Developed a fleet rental system with Python/SQL workflows for vehicle lifecycle management and automated billing.
- Implemented relational booking/inventory architecture and asynchronous JavaScript for transaction handling and error management.
- Developed Flask REST APIs for vehicle availability, customer bookings, rental lifecycle management, and transaction processing
- Implemented asynchronous JavaScript for API state handling, form submissions, and transaction error management.

Achievements

Competitive Programming: Solved 700+ DSA and competitive programming problems across LeetCode, HackerRank, CodingBat, and Codeforces with strong proficiency in Java and C++.

Milestones: Achieved Pupil rank on Codeforces and completed 200+ problems on LeetCode

Contests: Scaler School of Tech Contest Finalist in over 250 teams.

Technical Skills

Languages: Python, JavaScript (ES6+), SQL, Java, C++, C, Bash, HTML5, CSS3

Frameworks and Libraries: flask, React, Angular, Bootstrap

Tools : MariaDB/MySQL, Git, GitHub, Docker, WSL2, Linux
